## THE SECRET SAUCE CORPORATION NEEDS YOUR HELP!

The Secret Sauce Corporation has been hit by a ransomware attack and their famous sauce recipe has been stolen! You've been hired as the digital forensics investigator who needs to complete four cyber challenges to help TSSC get the secret recipe back in safe hands.

---

### BEFORE YOU START

These cyber challenges are played on the internet. Make sure your internet browser is updated to the most current version.

---

### HOW TO PLAY

- To move between scenes within the game, use the Next, Back, and directional navigation buttons
- Use your keyboard to enter clues into designated boxes; if a clue has more than one number, enter only the first number
- To review these game rules again, select the menu icon in the top-right corner
- All clues have 3 hints; use the Hint button beside each clue if you need more help. **WARNING:** Using hints and entering incorrect clues will deduct points from your overall score; the third hint reveals the clue and therefore NO points are earned for that clue
- Your first completion of this challenge is what will be recorded for your final score for reporting. Your score will be presented at the end of this challenge.
- Your time will be recorded for this challenge along with your total points.
