

Geography (GEOG) 365

Atmosphere, Weather, and Climate (Revision 4)

Delivery Mode: [Individualized Study Online](#) with [eText](#), and a [Home Lab](#). This course is charged a [lab fee](#).

Credits: 3

Area of Study: Science (Non-Business)

Prerequisites: [GEOG 265](#) is recommended but not required.

Precluded: None

Challenge: [GEOG 365](#) has a Challenge for Credit option.

Faculty: [Faculty of Science and Technology](#)

Status: Replaced with new revision, see the [course listing](#) for the current revision

Notes: [Centre for Science](#)

Overview

Geography 365 is a three-credit course in meteorology, the atmospheric science that makes the news and impacts everyone's life every day. This course is built around widely adopted and acclaimed instructional materials designed by the American Meteorological Society and the Cooperative Program for Operational Meteorology, Education and Training. This course is a study of the fundamentals of meteorology, with examples drawn from all around the globe, but primarily focuses on the extremely diverse weather of North America.

Geography 365 introduces the physical principles and processes that govern Earth's atmosphere; the nature of weather and climate; the formation of weather systems, including severe weather; and important aspects of weather monitoring, analysis, and forecasting. *Geography 365* includes a home-lab component, which involves completing a set of investigations of everyday weather events, as well as quantitative exercises with varying degrees of mathematical difficulty involving both metric and imperial units.

Outline

Outline

GEOG 365 comprises the following 15 units:

- Unit 1: Monitoring the Weather
- Unit 2: Origin, Composition, and Structure of the Atmosphere
- Unit 3: Solar and Terrestrial Radiation
- Unit 4: Heat, Temperature, and Atmospheric Circulation
- Unit 5: Air Pressure
- Unit 6: Humidity, Saturation, and Stability
- Unit 7: Clouds, Precipitation, and Weather Radar
- Unit 8: Wind and Weather
- Unit 9: General Circulation of the Atmosphere
- Unit 10: Midlatitude Weather Systems
- Unit 11: Thunderstorms and Tornadoes

- Unit 12: Tropical Weather Systems
- Unit 13: Weather Analysis and Forecasting
- Unit 14: Light and Sound in the Atmosphere
- Unit 15: Climate and Climate Change

 Evaluation

Evaluation

To **receive credit**  for GEOG 365, you must achieve a course composite grade of at least a **D (50 percent)** . You must achieve a minimum grade of 60 percent on the final examination. You must complete and submit all of the assignments, quizzes, and case studies to receive credit for the course. You may not omit any of them and take a grade of zero. The weighting of the composite grade is as follows:

A **bonus mark up to a maximum of 6%** will be granted for completing optional math exercises in the lab assignments.

Activity	Weight
Fifteen (15) Lab Assignments (2% each)	30%
Fifteen (15) Timed Quizzes (1% each)	15%
Two (2) Weather Case Studies (12.5% each)	25%
Final Exam	30%
Total	100%

The **final examination** for this course must be taken online with an AU-approved exam invigilator at an approved invigilation centre. It is your responsibility to ensure your chosen invigilation centre can accommodate online exams. For a list of invigilators who can accommodate online exams, visit the [Exam Invigilation Network](#) .

To learn more about assignments and examinations, please refer to Athabasca University's [online Calendar](#) .

Materials

Mills, Elizabeth W., ed. (2020). *Weather studies: Introduction to atmospheric science* (7th ed.). Boston: American Meteorological Society.  (eText)

American Meteorological Society. (2020). *Weather studies: eInvestigations Manual*. (2020–2021 & Summer 2021 ed.). Boston: American Meteorological Society.  (eText)

eTexts

Registration in this course includes electronic textbooks. For more information on [electronic textbooks](#) , please refer to our [eText Initiative site](#) .

Other Materials

The course materials also include an online study guide, course guide, and reading file.

Challenge for Credit

Overview

The Challenge for Credit process allows you to demonstrate that you have acquired a command of the general subject matter, knowledge, intellectual and/or other skills that would normally be found in a university-level course.

Full information about [Challenge for Credit](#)  can be found in the Undergraduate Calendar.

Evaluation

To [receive credit](#)  for the GEOG 365 challenge registration, you must achieve a minimum grade of 60 percent on the examination and a minimum grade of 50 percent on the weather case studies. The weighting of the composite grade is as follows:

Activity	Weight
----------	--------

Activity	Weight
Two (2) Weather Case Studies (20% EACH)	40%
Challenge Exam	60%
Total	100%
