

Health Administration (HADM) 321

Health Care Economics (Revision 2)

Delivery mode:	Individualized study online 🗗 with eText 🗹	
Credits:	3	
Areas of study:	Arts or Social Science	
Prerequisites:	None. A basic understanding of mathematics would be an asset to the student.	
Precluded:	HADM 321 is a cross listed course—a course listed under two different disciplines—with ECON 321 . HADM 321 may not be taken for credit by students who have obtained credit for ECON 321.	
Challenge:	HADM 321 has a challenge for credit option.	
Faculty:	Faculty of Health Disciplines 🗗	
Status:	Replaced with new revision, see the course listing for the current revision	

Overview

The primary purpose of HADM 321 is to introduce you to the field of health care economics. Like other economics courses, *Health Care Economics* is primarily concerned with how scarce resources are allocated. Much of the material presented in this course is similar to that found in an introductory economics course, but the emphasis here is on how concepts such as supply and demand, cost, and utility are applied to the health care sector. In this course students examine how the economic behaviours of health care consumers and suppliers, particularly in Canada, affect the manner in which resources are allocated.

Objectives

Each unit specifies learning objectives that students are encouraged to achieve in order to successfully complete the course. The course, as a whole, has been designed to provide you with the knowledge and skills that you will need to achieve the following:

- describe and discuss the concepts of health status and health care utilization, and the relationship between the two.
- describe the organization of the health care system in Canada, in terms of specific economic dimensions.
- use economic analysis to predict patterns of health care utilization.

Outline

HADM 321 comprises the following nine units:

- Unit 1: Introduction to Health Care Economics
- Unit 2: Outputs and Outcomes—The Products of the Health Care System
- Unit 3: Economic Dimensions of the Canadian Health Care System
- Unit 4: The Demand for Health Care

- Unit 5: Cost
- Unit 6: Supply of Health Care Services
- Unit 7: Demand and Supply
- Unit 8: Specific Market Models used in Health Care
- Unit 9: The Labour Market

Evaluation

To **receive credit** ☑ for HADM 321, you must achieve a **D** (50 percent) ☑ or higher on each evaluation activity. The weighting of the course grade is as follows:

Activity	Weight
Assignment 1	25%
Assignment 2	25%
Final Exam	50%
Total	100%

The **final examination** for this course must be taken online with an AU-approved exam invigilator at an approved invigilation centre. It is your responsibility to ensure your chosen invigilation centre can accommodate online exams. For a list of invigilators who can accommodate online exams, visit the **Exam Invigilation Network** .
